

Course Introduction

Corrado Santoro

Dipartimento di Matematica e Informatica

`corrado.santoro@unict.it`

Corso di “Introduction to Robotics and AI”

About me

- Corrado Santoro, class 1966
- I work in the field of electronics and informatics since 1982
- I teach:
 - Architettura degli Elaboratori
 - Embedded Systems
 - Sistemi Robotici
 - Advanced Robotic and Autonomous Systems
- Email:
`corrado.santoro@unict.it`
- I head the “ARSLAB”, a laboratory of robotics and embedded systems at the DMI
- In the free time, I play some instruments (guitar, violin)

Course Objective

- To understand what a **robotic system** is
- To understand the **working principles** of a robotic system
- To know the basic **architecture** (components) of a robotic system
- To clearly understand the meaning of **artificial intelligence**
- To know the basic **techniques** of artificial intelligence
- To understand the **link** between robotics and artificial intelligence

Course Contents

- **Overview of Robotic Systems**
- **Main Architecture of a Robotic System**
- **Robotic Simulation Tools**
- **Overview of Sensing Systems and Techniques**
- **Overview of Artificial Intelligence**
- **Symbolic/Logic AI**
- **Natural Language Processing**
- **Neural Networks and Deep Learning**
- **Generative AI and LLMs**
